SUMMARY

Software Engineering graduate from King Saud University with strong foundations in systems analysis, software architecture, and digital solution design. Experienced in developing full-stack applications and translating business requirements into structured technical solutions. Skilled in working with modern technologies including Java, Python, React, Flutter, and SQL, with strong interest in enterprise architecture, system design, digital transformation, and aligning business needs with technology solutions.

EDUCATION

B.S. in Software Engineering

King Saud University • 2026

GPA: 4.77

PROJECTS

Buffer - AI-Powered Career & CV Builder

Designed and implemented an integrated career platform that aggregates data from external sources and transforms it into structured user profiles and personalized recommendations. Focused on requirements analysis, data validation, system integration, and delivering scalable user workflows.

Technologies: React, Python, Supabase, GitHub API

Murshid Platform - Career Guidance Web Application

Developed a web platform to support decision-making through intelligent questionnaires and structured recommendation logic. Contributed to requirements definition, application design, and iterative development using Agile practices.

Technologies: React.js, Spring Boot, PostgreSQL, Trello, GitHub

SRS Document for Payroll Management System

Produced a complete Software Requirements Specification (SRS) following IEEE standards, including requirements analysis, use case modeling, process flows, and system design documentation to support structured solution development.

Technologies: Requirements Engineering, UML

Sabbih Mobile App

Developed mobile app for reading Azkar with reminder notifications and user-friendly interface to support daily spiritual practices.

Technologies: Flutter

SKILLS

HARD SKILLS

Java	Python	React	Flutter	SQL
Software Architecture	Requirements Engineering	UML Modeling	SDLC	API Integration
Agile Methodology	System Design			

SOFT SKILLS

Problem Solving	Teamwork	Communication	Critical Thinking	Analytical Thinking
Documentation				

CERTIFICATIONS

IBM Full Stack Web Development

IBM • Jan 2026

Backend Development Camp

Hash Plus • Jan 2026

Application Development Camp
